

Vertical Vacuum Mixer Tornado VMT

The **Vertical Vacuum Mixer Tornado VMT** is designed for the **efficient mixing of low up to high viscous** sealants and adhesives as PUR, coating compounds, plastisols, silicones, wall plaster, pastes as well as resins.

Customer benefit

Mixing tool

- Fast mixing in raw materials
- Short and intensive mixing phase
- Guaranteed homogeneity of the mixed
- Extracting and centrifugation of the mixing tool if the cover plate is closed

High Flexibility

- Variable batch sizes due to adjustable oscillation stroke
- Customizable to existing vessels

Fast Cleaning

- Minimal residual amount on the mixing tool

Technical Data

Material

- Stainless steel, mild steel

Motor

- Motor capacity up to 45 kW

Vessel

- Operational volume 160 - 600 L

Mixing tool

- Oscillation stroke adjustable
- Stroke speed 10 - 50 mm/s
- Revolution speed 20 - 200 R/min

Design

- Placement for a floor level access of pots
- Mixing tool product specific customizable
- Mixer is also available as a vacuum tight version
